

## **Candidate Statement**

Pharmacy professionals deserve the support they need to deliver safe, high-quality patient care and ensure public protection.

Throughout my career in retail pharmacy, long-term care, and regulatory affairs, I have seen how practice environments influence the quality, safety, and consistency of care that patients receive. These experiences have shaped my understanding of the challenges facing pharmacy practice and the importance of effective, evidence-informed regulation.

If elected to the College Board, I will contribute to governance that supports the College's mandate to protect the public by:

- Applying my experience across multiple sectors of pharmacy practice to help develop balanced, evidence-informed policies that are practical, effective, and focused on patient safety.
- Bringing thoughtful, collaborative decision-making that considers the impact of regulatory policies on patients, pharmacy professionals, and the healthcare system.
- Supporting governance that promotes high standards of professional practice, quality improvement, and public confidence in the profession.
- Helping ensure College policies remain relevant and responsive to the evolving practice of pharmacy .

I believe effective regulation is strengthened by practical experience, sound governance, and a commitment to serving the public interest. I would be honoured to earn your support.
