

I am seeking a seat on the OCP Board because regulatory policy must be as practical as it is protective. I will ensure governance remains grounded in the realities of daily pharmacy practice. My goal is for the College to act as a proactive, evidence-based steward — prioritizing safety while ensuring that inspections and investigations are efficient, transparent, and proportionate to risk.

My Leadership Style

I lead with transparency and common sense. I advocate for "right-touch" oversight, ensuring the intensity of regulation matches the level of risk. The Board must be a responsible steward of our professional standards, focusing on outcomes that directly improve patient care rather than increasing practice complexity.

What I Bring to the Table

I bring a grounded perspective shaped by experience in chain, independent, and hospital pharmacy. My career has focused on serving diverse populations, including Indigenous, rural, and underserved urban communities. I understand that public safety is not "one size fits all" and will ensure our standards protect all Ontarian's.

Serving the Public Interest

I am committed to ensuring every Ontarian receives safe, ethical, and equitable care. By focusing on organizational efficiency and objective, risk-based oversight, I will work to ensure the College remains an accountable and effective regulator that puts the patient's well-being first.
