

DISTRICT T COUNCIL CANDIDATE

Mardi Teeple R.Ph.T.

I am seeking election for the one seat on council held for a District T Candidate.

I have worked in community pharmacy for the past twenty years in direct patient care. This I believe has given me the insight and perspective that would serve me well to participate as a council member.

Background: I received my pharmacy education at Humber College with a post graduate certificate in Gerontology; I earned my OCP certification and as college registration for technicians became a reality, I completed the bridging program through to being one of the first group of technicians registered with the Ontario College of Pharmacists in 2010.

I have been committed to the college for the past 7 years serving on the Jurisprudence committee as a standard setter. I have participated with the working group of item writers for the Self Assessment for Pharmacy Technicians; the focus group for Practice Assessment for Pharmacy Technicians and most recently I joined the Quality Assurance Committee as a non-council member.

My philosophy: I believe pharmacy technicians are individuals who have stepped up to electively commit themselves to being accountable to the communities they serve. The responsibility of the pharmacists is evolving, as to should the demand for the support staff that aids them in the provision of care. It is important to encourage an environment of optimal patient care and to earn the trust that the public bestows on the pharmacy team

In conclusion: I feel that my history in community pharmacy coupled with my OCP experience will give me the tools I would need to be an asset on council for District T.

I would be very excited for the opportunity to sit with the policy makers of pharmacy and be a part of an environment that's mission is to protect the public.

I would appreciate your vote to be a council member for District T.

My sincere thanks Mardi
